

# GreenClaimed® 3G Composite Decking

## ProFormance360™ Shield

Advanced Protection from the Elements

The new GreenClaimed® 3G Composite Decking is a third-generation offering founded on the proven strength and durability of our original GreenClaimed® decking and featuring the exclusive benefits of our ProFormance360™ Shield. Inspired by the extreme resilience of the unique ionomer resin found in a golf ball's outer layer, the GreenClaimed® 3G ProFormance360™ Shield is the ultimate realization of one crucial goal: The creation of a composite decking with long-lasting protection for enduring aesthetics with minimal maintenance requirements. The ProFormance360™ shield offers 360-degree protection by effectively sealing the plank from all sides; guarding against fading, moisture, staining, and scratching to ensure decades of worry-free enjoyment.

New channeled design improves strength, reduces deflection.

- ProFormance360™ Shield for unmatched protection
- Fade, stain, scratch, and moisture resistant
- Channeled design improves strength, reduces deflection

## Proven Strength & Durability, Redesigned

In addition to the ProFormance360™ shield, the new GreenClaimed® 3G Decking offers an alternative, channeled plank format which provides a 20% greater strength-to-weight ratio. The reinvented design improves rigidity and tensile strength across the length of the planks -- dynamically reducing deflection and increasing stability under harsh environments and throughout challenging applications.
