

Java Fossilized® Wide T&G Bamboo Flooring

Quite simply the hardest floors in the world.

Twice the density and strength of almost any other flooring in the world, our Fossilized® wide plank flooring undergoes a proprietary manufacturing process that has scored over 4000+lbs. on the Janka hardness test. The effect of this process enhances both the color and grain contrast throughout the floor planks which makes for a more vibrant lifelike floor and emphasizes the natural beauty of the bamboo fibers.

- Ideal for high traffic areas
- Designed to install over any subfloor in 1/3 of the time
- Wider, longer planks give a cleaner more modern look
- Industry leading 10 coat scratch resistant finish

Announcing the World's Hardest Floors...
