Sedona TruOrganics

Your Floor Outdoors

The latest Cali Decking line, TruOrganics, is the culmination of almost a decade of composite decking expertise. A state-of-the-art construction combines 60% reclaimed wood fiber with 40% recycled HDPE (high density) plastic for boards that are stronger and never have to be sanded, sealed, or stained. With colors inspired by some of the nation's finest natural wonders, TruOrganics decking provides the perfect, worry-free escape to kick back in the great outdoors.

Denali TruOrganics

The Beauty of Wood Grain

Each TruOrganics plank sports a smooth, matte finish and natural hardwood embossing, to capture the look and feel of real wood... without the splinters!

Double the Possibility

Planks bear a light wood grain texture on one side and a slightly more pronounced embossing on the other. Boards can be installed either way for varying degrees of rustic charm.

Lean, Mean, and Green

A 3G core ensures higher tensile strength and resiliency, and the unique composite formula yields a material that is stronger and uniquely protected against moisture, insects, rot, and chemicals.

Fully Protected

A four-sided protective wrap shield around each plank guards against stains, scratches, snow, and sun damage, keeping TruOrganics low-maintenance in all seasons.

Surface	Wood Grain, Flat
Plank Length	Standard: 16 feet Wide: 8 feet
Plank Width	Standard: 5-7/16 inches Wide: 8-1/4 inches
Plank Thickness	7/8 inches
Milling	Groove and Groove
Construction	Coextruded Wood Plastic Composite
Joint Span	16 inches on center
Application	Residential, Commercial
Warranty	25 Year Residential
